

94401 - 94420 Solvent Dyes

Solvent Dyes can be used for transparent printing inks, as mordants for wood, as transparent colorants for solvent-based laquers, for tinting epoxy- and polyester resins and for similar applications.

The Solvent Dyes are easily soluble in most solvents. They are very brilliant and relatively stable. The dyes 94405 Solvent Red 127 and 94419 Solvent Red 160 are not recommended for coatings due to their inferior lightfastness. Most of the dyes can be easily dissolved in a mixture of 80% Ethyl Alcohol (70800), 5% water and 15% Methoxypropanol PM (70920). For most applications it is sufficient to use 1-5 g per liter.
