

40215 Yellow Ochre SA

Type: Yellow pigment
Delivery form: Powder
Chemical description: Natural earth
Color Index: Pigment Yellow 43, C.I. 77492
REACH: Natural product

Composition: $\text{Fe}_2\text{O}_3 + \text{Al}_2\text{O}_3 + \text{SiO}_2 + \text{TiO}_2$

Density: -
Rel. tinting strength: $\pm 5 \%$
pH Value: -
Solubility: not soluble in water
Oil absorption: 28 g / 100 g
Sieve residue (53 μm): 0.42 %
Water soluble content: < 1.00 %

Further Information:

Heat stability: 180°C
Lightfastness: 8, very good (scale 1-8)
Weather resistance: 5, very good (scale 1-5)
Acid resistance: 5
Alkal resistance: 5

Storage conditions: Shelf-life is minimum 5 years, if stored in a dry place at ambient temperatures. Keep packaging tightly closed.
