

41700 Verona Green Earth

Type: green pigment
Delivery form: powder
Chemical designation: Natural earth color
Color Index: Pigment Green 23, C.I. 77009
Origin: Verona

Specification:

Color: green

Composition: Iron silicate, Manganese, Potassium ferric, Aluminium with oxides of Fe, Mg, Al, K

Characteristics: large particles, not homogenous

pH-Value: 7

Colors of interference: no

Density: 2.60 g/cm³

Specific weight: 2.40

Opacity: sufficient

Light fastness: 7 (good)

Alkali fastness: good

Chemical stability: good

Humidity stability: good

Field of application: Wall painting, tempera, oil

Historic references: Roman, Greek, Renaissance
