

11416 Bianco San Giovanni

Made from high purity white hydrated lime. Is gently dewatered and dried.

Because it is made from marsh lime, the pigment can be slightly alkaline. When used in oil, this pigment must be rubbed particularly carefully, otherwise drying problems may occur during processing.

We recommend the coarser grind 11416 for use in plaster only.

Technical Data

Optical: pure white

Safety precautions:

Caution. The product may irritate the skin, eyes and respiratory tract.

Avoid contact with skin and eyes. Do not eat or drink while working.
