

60550 Shellac wax, bleached

Shellac wax is mainly a mixture of esters (approx. 60 %) and free alcohols (approx. 35 %). Furthermore, it contains small amounts of hydrocarbons, penta- and hentriacontanes and approx. 1 % varnish acid.

Form:	solid
Color:	yellow-amber
Ester value:	20 – 77 mg KOH/g
Acid value:	2 – 25 mg KOH/g
Melting temperature:	78 – 85°C
Drop point:	72 – 86°C
