

## 62600 Microwax

INCI-Name: Hydrogenated microcrystalline wax  
CAS-Nr.: 92045-76-6

Microwax is a kneadable, slightly tacky wax with a predominantly iso-paraffinic structure.

### Application:

Microwax is very suitable for the modification of predominantly crystalline, solid n-paraffins, e.g. for the manufacture of glues as well as anti-corrosion agents.

Microwax can also be used in the candle industry

### Technical Data:

Solidification point:	68 - 75°C	
Drop point:	76 - 82°C	
Penetration (25°C):	ca. 28 dmm	1/10 mm
Viscosity (100°C):	14 - 20 mm <sup>2</sup> /s	
Color:	white yellowish
