

31250 - 31252 Chamotte

31250 Chamotte, powder 0 – 0.5 mm

31251 Chamotte, fine gravel 0 - 4 mm

31252 Chamotte, gravel 0 - 10 mm

Chamotte are ground tiles which are often used in industrial furnaces.

Chamotte may be used as an additive for lime mortars to increase the stability, add color and also as a hydraulic additive.

Recipe for mortar:

1 part pit lime
1 part chamotte
2 parts sand

According to the manufacturer, chamotte is burnt from natural clay at a temperature of 1000° C. The grinding is done in a hammer mill.
