

31060 ITAL B2 / LEIT 01

Special hydraulic additive, chemically stable. Contains soluble salts, Pozzuolana earth, mineral aggregates and a special combination of additives which increase the fluidity, water-holding capacity and air permeability.

Application:

For exterior plaster work, to fill larger cracks in ceiling plaster (3 - 4 cm). To refill and plaster soft plaster work.

ITAL B2/LEIT 01 is especially suitable for mechanically stable and light-weight plaster work.

ITAL B2/LEIT 01 is a ready-for-use repair stucco. After the addition of demineralized water, mix thoroughly for 3 minutes. The stucco should be used within 30 minutes after preparation.

Mixing recommendations:

Purpose	Leit 01	Water
Plaster work, cavities	10 kg	10 l
For injection with a syringe, at least 6 mm	10 kg	18 l
